

3

! /bin/bash

set x,y and z to an integer data type

Declare-i x=10

Declare-i y=10

z=\$((x + y))

echo "\$x + \$y = \$z"

```
1  #!/bin/bash
2  # set x,y and z to an integer data type
3  declare -i x=10
4  declare -i y=10
5  declare -i z=0
6  z=$(( x + y ))
7  echo "$x + $y = $z"
```

\$bash -f main.sh
10 + 10 = 20

ให้ -i กำหนดตัวแปรเป็น integer
